

BURRELL OBSERVATORY OPEN HOUSE

FRIDAY MARCH 3, 2017 at 7:30 PM

OUR QUEST TO UNDERSTAND THE UNIVERSE

By

Dr. Stacy McGaugh

Chairman of the Department of Astronomy and
Director of the Warner & Swazey Observatory
Case Western Reserve University

The Burrell Observatory is proud to host an open house program on Friday March 3, 2017 at 7:30 PM. Dr. Stacy McGaugh present a lecture on the things we do - and do not - understand about the universe today.

People have always asked the big questions, and there have been great advances in measuring the size and age of the Universe, but its composition and the underlying physics remains mysterious.

The lecture will be presented in the “Center for Innovation and Growth” (CIG) 340 Front Street Berea.

After the lecture, the Burrell Observatory will be open for viewing, weather permitting.

This is a free lecture and no reservations are required. The CIG is located the East side of Front Street, North of Bagley Road at 340 Front Street. Parking is available next to and behind CIG and adjacent to the Observatory off of Fifth Avenue West. For questions, contact the Observatory Director at gkader@bw.edu. Or the Department of Physics and Astronomy at 440-826-2312.
